

Veneer Scots Pine 0.85 mm

Item No. 01-000178

Description

A striking feature of the pine is the irregular course of the annual rings, which leads to unusual patterns in the wood. The colouring is reddish yellow and shows a pronounced contrast between the early and late wood in an expressive pattern. The darker, reddish-brown late wood creates distinctive veins on the tangential surfaces and strong stripes on the radial surfaces.

Trade names and other names

German: Kiefer, Föhre, Forche, Forle, Rotkiefer

Chinese: 松木

Available veneer thicknesses

1.4 mm, other thicknesses on request

Occurrence

Widespread throughout Europe from Spain to the Arctic, especially in Northern and Eastern Europe as far as Siberia and Asia.

Trunk and bark

The pine tree can reach a height of up to 50 m, with a diameter of up to 1.0 m. The pine is very fast-growing. The bark of the pine is brown-red, smooth, thin-scaled and flaking. With increasing age, a deep fissured bark forms.

Characteristics and wood colour

The resin channels and annual rings are clearly visible. The wood of the pine is very rich in resin and darkens quickly. The brown-red heartwood of the pine contrasts strongly with the yellowish sapwood of the pine.

Specifications

Category	Veneers
Product group	Veneers sliced
Thicknesses	0.85 mm
Weight kg/m2	0.400
Specie	Scots Pine
Botanical name	Pinus sylvestris
Wood type	Softwood
Main occurrence	Europe
Wood origin	Germany Austria Switzerland
Manufacturing/origin	Austria
Certification	not certified FSC®100% 100% PEFC
Colour	yellow
Hue	clear
Use	furniture interior doors construction wood
Customs tariff number	44081000
Packaging	in bundle, approx. 24-32 sheets
Items on stock	yes
Date of delivery	approx. 3 - 6 working days
Postal shipping	nein
