

Veneer Santos Rosewood 0.56 mm

Item No. 01-000347

Description

The colour and structure resemble the living image of Rio rosewood. This is why Santos rosewood used to be used as a substitute for the rare, sought-after and now endangered Rio rosewood. The basic shade is between yellow-reddish and violet-brown. Due to the uneven distribution of the colour stripes, the appearance can vary greatly. The light yellow sapwood often provides vivid contrast in the purple-violet to black wavy zones.

Trade names and other names

German: Santos Rosewood

English: Santos Rosewood

French: Palisandre de Santos

Italian: Palissandro Santos

Spanish: n.a.

Dutch: n.a.

Portuguese: n.a.
