

Veneer Poplar Burl 0.60 mm

Item No. 01-000432

Description

Numerous irregular groups of small black burls lie embedded in a light ground texture. The wavy sandy-brown annual ring lines of poplar burl are reminiscent of a pristine desert landscape, where the burls protrude from the sand as dark hills.

Trade names and other names

German: Pappel Maser

English: Poplar burl, Black Poplar

Spanish: Álamo negro, Chopo negro

Dutch: Zwarte populier

Portuguese: Álamo, Álamo-negro, Choupo negro

Arabic: n.a.

Chinese: 黑木

Available veneer thicknesses

Thicknesses on request

Occurrence

The black poplar is found throughout Europe, Siberia, Turkey, North Africa and India.

Trunk and bark

This tree grows somewhat slower than the other poplar species. The stem of the black poplar is very straight-growing and tends to burl. The bark is ash-grey at first, but quickly develops into a strong bark and later becomes grey-brown and heavily cracked.

Characteristics and wood colour

In structure and texture, this poplar species is very similar to the other poplar species, but it should be noted that the black poplar develops an intricate grain pattern at the burls. This grain pattern creates a lively and very decorative pattern.

Specifications

Category	Veneers
Product group	Burl veneers
Thicknesses	0.60 mm
Weight kg/m2	0.270
Specie	Mappa Burl
Botanical name	Populus spp.
Wood type	Hardwood
Main occurrence	Europe
Wood origin	Liechtenstein Switzerland
Manufacturing/origin	Central Europe
Certification	not certified
Colour	light-brown
Hue	medium colour
Use	interior Automotive expansion
Customs tariff number	44089000
Packaging	in bundle, approx. 24-32 sheets
Items on stock	yes
Date of delivery	approx. 3 - 6 working days
Postal shipping	nein
