

Bouls Red Oak 70 mm

Item No. 02-000524

Description

The red oak has a firm, straight-grained and slightly porous wood, which has a soft reddish colour. On the longitudinal surfaces, sharply separated annual rings and ring-shaped early wood vessels show distinctive drawings or stripes. Radially, the conspicuous mirrors create excellent decorations.

Trade names and other names

German: Roteiche, Zerreiche

English: Red oak, American red oak, Northern red oak

French: Chêne rouge, Chêne rouge américain, Chêne rouge d'Amérique

Italian: Quercia rossa, Rovere rosso

Spanish: Roble americano, Roble rojo

Dutch: n.a.

Portuguese: Carvalho-vermelho-americano, Carvalho-do-norte-vermelha, Carvalho-vermelho-do-norte

Arabic: n.a.

Chinese: 栎

Available thicknesses

32, 52, 60, 70, 80 mm, other thicknesses on request.

Occurrence

The red oak is native to eastern North America and Europe.

Trunk and bark

The Red Oak tree grows to a height of 20 to 25 m and reaches a diameter of 61 to 90 cm.

Characteristics and wood colour

The coarse-pored wood has very wide-lumen vessels. These remain unthyled even after kerning, so that red oak is not suitable for barrel production. Heartwood of red oak is brown to red (pinkish brown) brown to yellow, without colour stripes. The sapwood is clearly contrasting in colour to the heartwood.

Specifications

Category	Lumber
Product group	Unedged lumber
Thicknesses	70 mm
Weight kg/m3	720.000
Specie	Red Oak
Botanical name	Quercus rubra
Wood type	Hardwood
Main occurrence	Europe North America
Wood origin	Germany France Austria Switzerland
Certification	not certified FSC®100%
Colour	red brown
Hue	medium colour
Use	furniture interior doors
Surface structure	rough-cut
Humidity	10% ± 2%
Customs tariff number	44079110
Packaging	loosely
Items on stock	yes
Date of delivery	approx. 3 - 6 working days
Postal shipping	nein
