Description

Pizol formerly also "Piz Sol" means "high peak" in Romansh. The family-friendly mountain massif in eastern Switzerland, popular in summer and winter, inspired us in the design of this wall covering. The product features an irregular machine-chopped or brushed surface. The light brown old wood-like colour highlights the desired rustic character of the cladding. Differences in colour and structure are due to the nature of the wood. Small breaks in the wood are characteristic for the appearance, the very rustic character is explicitly desired and underlines the product in its form and naturalness.
