Dutch: Fijnspar

Portuguese: Abeto-falso, Espruce-da-Noruega

Arabic: Sanawbar saghir

Chinese: 杉木

### Veneer thicknesses

0.7 mm, other thicknesses on request

### Occurrence

Spruce ( *Picea abies* ) is widespread throughout central, northern and north-eastern Europe, from the 69th parallel north of the Pyrenees to Russia and Scandinavia.

### Trunk and bark

The spruce tree reaches a height of up to 60 m and can reach a diameter of up to 2.0 m. The trunk of the spruce is very long. The trunk of the spruce is very slender, columnar and strongly tapering, with plate-shaped roots, which makes spruce very exposed to wind breakage. The bark of spruce is light brown, turning reddish grey to

reddish brown with age, up to about 10 mm thick and separating into scales.

#### Characteristics and wood colour

The annual rings are clearly visible in the spruce due to the dark late wood zones. The wood is quite resinous. The grain is consistently very straight, the texture medium coarse to fine and even in spruce. The wood of spruce is very light yellowish-brown, often almost whitish and without special markings. Spruce has a light, natural lustre. The sapwood and heartwood are hardly distinguishable in spruce. Heartwood colouring is not present. Only in northern Europe and in moist locations is the heart of the spruce slightly reddish.

## Specifications

Category	Veneers
Product group	Burl veneers
Thicknesses	0.70 mm
Weight kg/m <sup>2</sup>	0.330
Specie	Spruce Burl
Botanical name	Picea abies
Wood type	Softwood
Main occurrence	Europe
Wood origin	Germany   Italy   Croatia   Austria   Switzerland
Manufacturing/origin	Austria
Certification	not certified
Colour	light-brown
Hue	medium colour
Use	interior
Customs tariff number	44081000
Packaging	in bundle, approx. 24-32 sheets
Items on stock	yes
Date of delivery	approx. 3 - 6 working days
Postal shipping	nein
