

## Veneer Chestnut Burl 0.60 mm

Item No. 01-000426

---

## Description

The grained chestnut has a brown-yellow, slightly cognac-coloured hue, which gives the wood a warm and friendly appearance. Indicated circles and swirls dominate the picture of this very rare wood. Small, very fine and hardly distinguishable burls are scattered throughout the wood.

### Trade names and other names

German: Kastanie Maser, sweet chestnut burl

English: Chestnut burl

French: Loupe de Châtaigner

Italian: Radica di Castagno

Spanish: n.a.

Dutch: n.a.

Portuguese: n.a.

Arabic: n.a.

Chinese: 栗木

### Available veneer thicknesses

0.6 mm, other thicknesses on request

### Occurrence

The chestnut tree originates from Asia and was already cultivated in Europe in ancient times, so that today the main occurrence is still in the countries of the Mediterranean area, especially in Portugal, Spain, Italy, the Balkans, North Africa and Asia Minor up to the Caspian Sea. North of the Alps, the chestnut is found especially in Switzerland, southern Germany, southern and western France and southern England.

## Tree trunk and bark

Chestnut grows up to 25m high and with diameters of up to 1.2m. As a result of the strong cane growth, the trunk is rarely more than 10 to 12m knot-free in chestnut. The bark is glossy reddish brown with white lenticels on one-year-old branches, olive brown on perennial branches, spotted by lichen, and shows bark formation after the 15th year. It is grey-brown, longitudinally cracked and contains about 12% tannic acid.

## Characteristics and wood colour

Pores ring-shaped and large. Annual rings very distinct. The large pores form clear needle cracks in longitudinal section. Decorative wood with high tannic acid content. The sapwood and heartwood of the sweet chestnut are well separated. The sapwood is very narrow and dirty yellow-white, while the heartwood is light brown and shiny when fresh, darkening later.

# Specifications

Category	Veneers
Product group	Burl veneers
Thicknesses	0.60 mm
Weight kg/m <sup>2</sup>	0.330
Specie	Sweet Chestnut burl
Botanical name	Castanea sativa
Wood type	Hardwood
Main occurrence	Europe
Wood origin	Germany   France   Italy   Czech Republic
Manufacturing/origin	Spain
Certification	not certified
Colour	red brown
Hue	medium colour
Use	interior   Automotive expansion
Customs tariff number	44089000
Packaging	in bundle, approx. 24-32 sheets
Items on stock	yes
Date of delivery	approx. 3 - 6 working days
Postal shipping	nein
