

Edgebanding Fineline Limba 09 | 2-layer | approx. 1.0 x 24 mm

Item No. 05-000423

Description

The continuous rolls are generally available in **100 or 150 running metres**. We only sell the veneer edgings as entire rolls and cannot unroll smaller quantities. If you want to know the exact quantity m1 per roll, please ask us.

Continuous thick veneer edgings from the roll are produced in multiple layers in thicknesses from 1.0 to 3.0 mm. We stock many types of wood in standard thicknesses of 1.0 mm 2-ply, 1.5 mm 3-ply and 2.0 mm 4-ply as well as standard widths of 24 and 30 mm. The real wood veneer edges are sanded on the surface and thickness-calibrated on the reverse side. The structure of several veneer layers ensures high strength, good milling properties, hardly any distortion and constant dimensional stability. The layers of thick veneer edges are glued with PVAC white glues.

Finishing options

- -fine surface sanding
- -thickness calibration on the reverse side
- -bonding-friendly backsides
- -priming or PVAc pre-coating
- -SK pre-coating 180/200/250 g/m2

Advantages

- -highest strength in practically all areas of the edge
- -best milling properties
- -hardly any warping or twisting
- -constant dimensional stability

Specifications

Product group Edgebanding Widths 24 mm Thicknesses 1.00 mm Tolerance of thickness ±0.05 mm Weight kg/m1 0.012 Specie Fineline / Reconstituted Veneer Botanical name Fineline Wood type Hardwood Wood origin China Manufacturing/origin Germany Certification not certified Construction 2-layer Surface structure unsanded Surface treatment untreated Gluing PVAC glue D3 according to DIN EN204 Customs tariff number 44081000 Packaging on roll Items on stock on sale (limited stock available) Date of delivery approx. 2-3 working days	Category	Panels
