

Stakkato Aromatic Swiss Pine | split

tem No. 08-000246

Description

 $Staccato\ is\ a\ 3-dimensional\ wood\ surface\ created\ by\ splitting\ solid\ old\ wood\ or\ wood\ or\ by\ grading\ strips\ of\ different\ thicknesses.$

The Stakkato wall elements are split from Swiss stone pine and the surface is lightly brushed. The plank format is 600 x 150 mm and the thickness is between 16 and 30 mm. The slat width is fixed with 30 mm and falling slat lengths.

The toothed joint is ideal for concealed installation of the wall elements and there is no visible buttor step to the next element. The wall elements with OSB support plate are only suitable for indoor use.

Specifications

Category	Reclaimed Wood Wall and Ceiling
Product group	Stakkato wall panels
Lengths	600 mm
Widths	150 mm
Thicknesses	22.0 mm
Weight kg/m2	12.100
