

Wall panels VULCANO Larch carbonized

Item No. 08-000260

Description

Once upon a time, a long, long time ago, Europe was also volcanic land. As I said, that was a long time ago and the volcanoes are all extinct. We use an ancient charring technology similar to a Japanese tradition "Shou-Sugi-Ban" or "Yakisugi" to char our native larch into a charcoal-black wood of inimitable elegance. Traditionally, only Japanese cedar wood was used in this production of controlled burnt wood. Today, other woods such as larch, red cedar, fir, pine or oak are also used in Europe. The charring of the outer layer preserves the wood by forming a natural protection against fungi and vermin. As black as the board is, the play of colours of the light reflections on the richly structured wood in crocodile leather look is as varied and appealing. That's what we simply call: Fire away!

Specifications

Category	Reclaimed Wood Wall and Ceiling
Product group	Antique facades
Lengths	4000 mm
Widths	140 mm
Thicknesses	24 mm
Weight kg/m ²	11.800
Specie	Knotty Larch
Botanical name	Larix decidua
Wood type	Softwood
Wood origin	Austria Central Europe
Manufacturing/origin	Austria
Certification	not certified
Colour	black
Hue	medium colour

Profile	floor board
Construction	solid
Quality front	AB
Wood connection	groove-grove and separate tongue
Surface structure	carbonized
Surface treatment	untreated
Humidity	12% ± 2%
Customs tariff number	44071210
Packaging	packed to 5 pieces
Items on stock	no
Date of delivery	approx. 3 - 6 weeks
Postal shipping	nein
