Description

Rustic, textured and solid is the Mont Blanc wall panel. The beautiful Italian-French white mountain inspired us to design this product. The product has an irregular chopped surface. The traditional chopped surface structure is imitated with a specially developed machine in order to return to original forms in the rapid change of time. The dark brown colour emphasises the desired rustic character of the formwork. Differences in colour and structure are due to the nature of the wood. Small breaks in the wood are characteristic for the appearance, the very rustic character is explicitly desired and underlines the product in its form and naturalness.
