

veneer sample West Indian Locust

Item No. 18-000059

Description

Veneer sample with inscription of the wood species as well as the botanical name.

The size corresponds approximately to A4, i.e. approx. 30 x 21 cm. For certain types of wood, the veneer samples are narrower and smaller. The veneer thickness can vary between 0.5 and 1.5 mm and cannot be specially selected. The patterns are partly laminated with fleece on the back and can be joined in width.

The veneer samples serve exclusively to illustrate the character of the wood and the colouring. Wood is a naturally grown raw material which can show irregularities in colour and structure.

Specifications

Category	Veneers
Product group	Veneer samples
Weight kg/piece	0.030
Specie	West Indian Locust
Botanical name	Hymenaea courbaril
Wood type	Hardwood
Main occurrence	South America
Manufacturing/origin	Germany Switzerland
