

veneer sample European Oak Flakes

tem No. 18-000353

Description

 $\label{thm:condition} \textit{Veneer sample with inscription of the wood species as well as the botanical name.}$

The size corresponds approximately to A4, i.e. approx. 30 x 21 cm. For certain types of wood, the veneer samples are narrower and smaller. The veneer thickness can vary between 0.5 and 1.5 mm and cannot be specially selected. The patterns are partly laminated with fleece on the back and can be joined in width.

The veneer samples serve exclusively to illustrate the character of the wood and the colouring. Wood is a naturally grown raw material which can show irregularities in colour and structure.
